

Körber Supply Chain

Connect Your Warehouse in Real-Time with K.Motion Collect for GP

Introduction

When your warehouse data is disconnected from Microsoft Dynamics GP, people across your organization waste time tracking down inventory and looking for materials. Break down the digital silos to streamline warehouse and manufacturing operations with clear insight into current, accurate inventory.

Helping you to work smarter and faster

K.Motion Collect for GP is the ONLY WMS (Warehouse Management Solution) that integrates directly and

posts real-time data into Dynamics GP order entry, production, and shipping to provide employees across the organization with the information they need to work smarter and faster. Timely, accurate inventory and materials information accelerates distribution and manufacturing operations to increase customer satisfaction. Elimination of paperwork and manual data entries reduces errors, drives productivity, and simplifies training.

Share the Microsoft Dynamics GP database with live data

- Direct data integration with Microsoft Dynamics GP Manufacturing, SOP, POP, Inventory
- Optimized warehouse management for medium and large enterprise running Microsoft Dynamics GP
- More than a thousand configuration options, providing the fastest time to value of any solution on the market

WMS built for distributors and manufacturers

K.Motion Collect for GP balances physical and transactional inventory factors to deliver the fast order turnaround that today's customers expect with:

- Automated data collection (ADC) and barcoding to eliminate data entry and reduce errors
- Guided put-away functions to ensure items are located in the correct bin locations from the start
- Workflows that automatically generate guided picking, display picking & packing notes, print labels, and invoices to simplify the fulfillment process
- Accurate inventory location data to eliminate time spent "looking around" for materials
- WIP sequence tracking to improve visibility of WIP materials throughout the manufacturing process
- Lot or serial traceability that saves time identifying recall items from the warehouse through production

End-to-end warehouse management

INBOUND	INVENTORY	OUTBOUND	MANUFACTURING
Receiving	Site transfers	Sales order picking (order fulfillment)	Manufacturing picking
In-transit receiving	Bin transfers	In-transit picking	Manufacturing finished good receipt's
RMA receiving	Inventory adjustments	Sales order wave picking	WIP sequence tracking
SOP returns	Physical inventory/ cycle counts	Order management dashboard	Manufacturing wave transfers
Handheld label printing	Multi-bin	In-transit verify	Manufacturing reverse issues
Directed put-away	Inquiries	Verify pack-out	Manufacturing dis-assembly
Item alias	Barcode label manager	Enhanced pack	Manufacturing labor/ machine time
Combined barcoding	Transaction logging	Zone picking	
Edit lot attributes	Enhanced multi-bin	Order allocation postponement	
Dynamic order allocation	One scan lots	Order entry	

K.Motion Collect for GP embeds WMS data directly into Dynamics GP, so there is no time lag on data updates or manual posting required. With real-time, two-way data visibility, your organization can quickly increase efficiency for put away, movement, and fulfillment. Automated workflows and directed tasks are delivered to mobile devices to maximize efficiency and drastically reduce operational costs.

Full integration to GP Manufacturing, Horizons, and Vicinity solutions supports all types of manufacturing operations. K.Motion Collect for GP

helps automate and streamline operations for discrete or process manufacturers—including manufacture to stock and manufacture to order workflows.

All this functionality is supported by a team of experts in warehouse management. With more than 20 years of experience and 400+ successful implementations, we will help you optimize and extend your current workflows, processes and procedures to quickly realize the benefits of a fully integrated WMS.

Easy to learn and use

Simple and intuitive

K.Motion Collect for GP requires little training – it's simple and intuitive for warehouse workers to use. Real-time information and feedback gives workers step-by-step guidance on what and where to pick. With no manual data entry, errors are eliminated and Dynamics GP is updated accurately.

To ensure a high-quality hand-held user experience, we perform extensive compatibility testing on hardware. Through premier partnerships with Zebra Technologies®, Honeywell® and other leading hardware manufacturers, we support the best barcode scanning technology available today.

Warehouse insights for data-driven decisions

The tight integration with Dynamics GP provides managers with real-time insight into the metrics that drive your daily operations with:

- Reporting and data visualization that simplifies decisions for staff

assignments, inventory placement, and shipment management

- Capture of actual costing through hand-held labor and machine time
- Clear visibility to important warehouse and employee metrics like most efficient picker/receiver, receiving/picking cycle times, picking accuracy, and much more

Build a Competitive Edge with K.Motion Collect for GP

With tight resources and relentless competitive pressure, you need a technology partner with a proven track record. At Körber Supply Chain, our advanced, proven solutions for the warehouse, transportation, and logistics ecosystem will support your supply chain for the future. We can help you take control of data to achieve greater efficiency, uncover actionable insights, and stay ahead of the competition.

Services and support to deliver fast ROI

Our professional service consultants are experts in warehouse logistics and Microsoft Dynamics® GP to help you optimize operations. Following a proven project methodology, we ensure each unique K.Motion Collect for GP project is installed correctly and efficiently for a smooth transition to a more streamlined, automated distribution or manufacturing operation.

Our experienced and knowledgeable support team uses state-of-the-art technology to connect with your system remotely to diagnose and correct issues should there be any. The annual maintenance contract provides unlimited telephone support, unlimited incidents, and forward compatibility for your K.Motion Collect for GP.

Let's talk about how we can help you build a competitive edge.

See how extending K.Motion Collect for GP into your warehouse and manufacturing facility will drive efficiency and support profitable customer relationships.
